Applicant's election without traverse of species I of Group I in the reply filed on 10/20/05 is acknowledged.

Claims 5, 8, 13, 15, 22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species and invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/20/05. Contrary to applicant's remarks, claims 5, 8, 13 do not read on the elected species.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, 7, 9-12, 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al (US-4709873). The guide member reads on at least the element 16 and leader block combination and the securing mechanism reads at least on element 106 or 106A. All elements being are coupled together. The receiving portion of claim 3 reads on a portion of the rear circumference of element 17. The tab of claim 12 reads on at least element 110.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gavit et al (US-6889927) is cited to show another similar apparatus.
